A single solution to a complex problem.

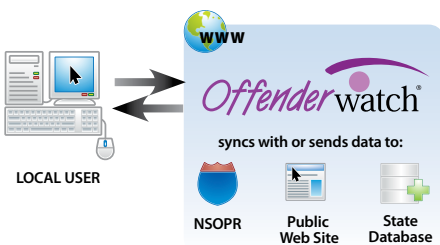

- Statewide OffenderWatch® implementation
- Agencies using OffenderWatch®

Managing registered sex offenders and notifying the community of their whereabouts has become a full-time job for most law enforcement agencies. Ten years ago, WatchSystems set out to solve this problem by creating OffenderWatch® – a web-based system that provides offender registration, ongoing compliance management, and community notification.

With valuable input from our nationwide law enforcement user group, OffenderWatch has become the industry-standard platform for registered sex offender registration, monitoring and community notification. OffenderWatch® is in use by over 600 agencies nationally, including 11 statewide implementations.

Keep it simple.

OffenderWatch® is state-of-the-art technology wrapped in a single, simple solution. Since OffenderWatch is a web-based system, with all data housed on WatchSystems' CJIS-compliant servers, there is no investment in hardware. The software is modular, so that it can be custom-tailored to the subscribing agency's own particular workflow in a matter of weeks. And OffenderWatch® is delivered and supported by seasoned professionals from Watch Systems who understand law enforcement and offender management — all so that you don't waste your time teaching us how you want things done. **Simple.**

"OffenderWatch® has been the ultimate solution for our department and community... OffenderWatch® is provided at no cost to the people in Peoria County, it's a tremendous service, still can't figure out why every law enforcement agency in America hasn't done this yet!"

— **Sheriff Mike McCoy**
Peoria County Sheriff, Peoria, Illinois

Why OffenderWatch?

- Compliance:** OffenderWatch® is a single solution for your agency to register offenders, update a SORNA-compliant database and comply with registered sex offender management laws, while providing BOTH registration AND community notification.
- Public Service:** OffenderWatch® provides an effective means of community notification via a single platform which generates neighborhood maps, automated postcards and email distributions.
- Cost-Effective:** OffenderWatch® demands less of an agency's resources and personnel than traditional, paper-based record-keeping. And since OffenderWatch is COTS, it can be up and running in less than 30 days.
- Intelligent:** OffenderWatch® generates automatic alerts and promotes interaction among agencies, counties, and states. The system syncs with NSOPR daily.
- Reliable:** OffenderWatch® is a web-based system that provides 24/7, worry-free technology with 100% up-time.
- It Works!** OffenderWatch is in use by over 600 agencies nationwide, and is the standard statewide platform in 11 states

Key Features & Benefits

HOW OFFENDERWATCH® HELPS YOUR DEPARTMENT

OffenderWatch® provides the definitive data you require to quickly answer for the whereabouts and compliance status of your offenders.

 OffenderWatch® provides your registration officers a web-based, fully SORNA compliant, database to house all the data associated to your offenders — searchable, mappable, exportable, printable data related to demographics, crimes, addresses, comments, photos, fees, vehicle/phone/email details, etc. As offenders move from jurisdiction to jurisdiction, all of this data can be automatically imported saving enormous time while preserving an offender's history. State registration forms are automatically printed, and state repositories can be electronically updated.

ADDRESS VERIFICATION / COMPLIANCE CHECK CYCLE MANAGEMENT

 OffenderWatch® manages the address verification / compliance check cycle and places offenders on a calendar, based on their individual verification cycles, with an automatic reminder system.

 This saves time and keeps your office in compliance with the law. Up to 5 different verification cycles per offender can be managed and displayed on the calendar. Users can print monthly reports containing offender profiles, maps and calendars for all offenders due for compliance checks and re-registration in that month.

AUTOMATIC SAFETY BUFFER ZONES AND RESIDENCY RESTRICTION ALERTS

 OffenderWatch® automatically manages the safety buffers and residency restrictions around schools, day cares, churches, bus stops or other places where children gather. OffenderWatch automatically alerts deputies to a safety zone incursion as the offender is registering their residency address. OffenderWatch® supports both single address points as well as parcels of protected addresses.

The System supports any safety buffer ordinance that it is given and will keep your office and your offenders in compliance, even as these laws change.

With OffenderWatch®, your staff AND your offenders can quickly test an address to see if it is legal for the offender to live there.

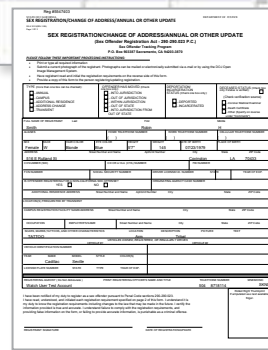

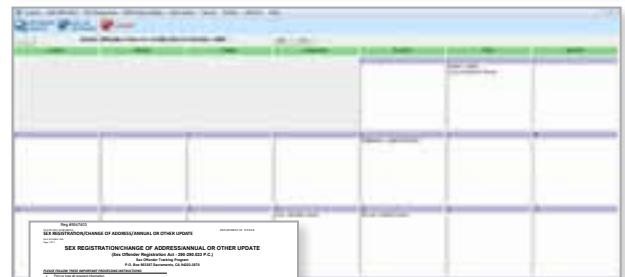

Additional Available Features

 **AUTOMATIC BOOKING ALERT**
OffenderWatch automatically notifies your registration officer if one of your offenders is booked into a jail anywhere in America.

 **ACTIVE OFFENDER COMMUNICATION**
OffenderWatch® calls or emails offenders automatically with personalized reminders for upcoming registration or verification appointments, or compliance advisories.

 **CUSTOM AGENCY ALERT EMAILS**
Get the most out of your enrolled citizen contact information. Create custom email announcements to your citizens for any topic of interest to your community.

 **POSTAL MAILING SERVICES**
OffenderWatch® allows 1-click generation of agency-personalized US Postal notification mailings to all of the residents within a defined radius of your agency.

PERSONALIZED AGENCY WEB PAGES FOR YOUR CITIZENS

OffenderWatch provides your agency with an agency-specific, personalized community web page where your citizens may access community information, register for email alerts or track specific offenders — all based on your publishable offender data.

Sheriffs and police departments can cooperate and maintain a single county-wide database, with separate portals for each agency, or WatchSystems can create a single shared banner with each participating agency credited.

The OffenderWatch® web page is also a public relations asset for your agency, providing your community with sex offender information in the most user-friendly form available — the internet!

SMART RADIAL MAPPING

Citizens may input an address into OffenderWatch and generate a map of offenders within a specific radius. OffenderWatch analyzes the density of offenders near the address and either restricts the radial (down to .25 mile) or enlarges the radial (to up 2 miles) to provide citizens with a map of offenders that is a reasonable and manageable number.

CUSTOM E-MAIL NOTIFICATIONS

On your web page, citizens may confidentially register as many addresses as they wish to be monitored automatically by OffenderWatch®. They will be notified by your agency's personalized email if any offenders move into the proximity of their home, school, day care, bus stop, park or any address important to them.

OffenderWatch® automatically generates personalized emails without intervention by your staff. Citizens can also register to be notified if a specific offender of interest to them changes address.

CUSTOM POSTAL NOTIFICATIONS

Within 48 hours of offender registration, OffenderWatch® prints and mails postal card notifications to all residents within the prescribed radius as required by your law, plus the institutions you maintain on a notification list (schools, day cares, libraries, etc...).

OffenderWatch® postal notifications have saved law enforcement agencies all over America millions of man-hours by eliminating the time consuming door-to-door distribution of offender flyers. OffenderWatch® automates this process and assures your office is in compliance with the law!

PERSONALIZED WEBSITE AND EMAIL HEADER

Watch Systems designs a personalized web site and email header for your department.
